## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or would not have rendered obvious a system for a combined television (TV) and frequency modulation (FM) radio receiver, such as claimed in claims 1-8, the system includes: an IF processor (230) that generates first local oscillating signals if a current mode is a TV mode and generates second local oscillating signals if the current mode is an FM radio mode, and converts the IF signals into first baseband signals and first secondary sound IF signals, and/or converts the primary sound IF signals into second secondary sound IF signals; and a controller (280) that controls the selection of the tuner (210) based on TV channel selection data or FM radio channel selection data, controls the IF processor (230) to generate the first local oscillating frequency signals if the current mode is the TV mode and generate second local oscillating frequency signals if the current mode is the FM radio mode, and applies the TV sound or FM radio mode data to the audio demodulator (260).

The closest prior art, Kikuchi (US 6,211,925) and Wignot et al (US 5,148,280) disclosed a system for a combined television (TV) and frequency modulation (FM) radio receiver, either singularly or in combination, fail to anticipate or render obvious the present invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
